Starting soon!

React (pt. 2)

JFSS CS Club 2022/23
Ali

Hooks

- **Allow you to make your functions dynamic**
- **<u>UseState</u> Hook**

useState()

- **State is an object that contains info about the component**

```
1 import React, { useState } from 'react';
2
3 const App = () => {
4
5   const [mssg, setMssg] = useState('This is a functional component!');
6
7   return <h1>{mssg}</h1>
8 }
```

Let's Get Started

React Project

- Using React and useState, make a project of your own
- Make someone click a button and then display <u>something unique</u>
  - Could be a meme, a joke, scary stuff, play a sound
